AI Gesture Detection Device / Task reminder — *June 2024 - Present*

- Currently designing and developing an AI Gesture Recognition Device to support children with Autism in managing daily school activities.
- Leveraging skills in Python, swift, and C++ to develop applications and for debugging issues. Soldering the components, CAD for the 3D printed parts, and PyTorch for the Machine Learning aspect.
- Developed applications increasing my knowledge of web applications.
- Used Github project management tool (**JIRA**) to help set times, organize tasks and plan projects.
- Formulated thesis/project proposal requiring technical documentation and project management skills.

Personal Web Server — *August 2024 - Present*

- Designed, launched, and secured a personal website/web server using a Raspberry Pi.
- Installed and configured a custom firewall to protect the server from unauthorized access and added helpful API's to manage email server notifications, monitoring, and insights.
- Automated multiple daily security checks and updates, integrating alerts to my phone and leveraging fail2ban to block malicious user attempts proactively.

First Place in CAD Design Competition — *June 2022*

- Designed and developed a Single Handed Utility Tool for people with disabilities, which earned me 1st place in the multi college AutoDesk Design Competition.
- Leveraged Fusion 360 software for precise product development, enhancing user accessibility and usability for those with limited mobility.
